

# Our inductors add value to your products

Don't subtract value from your electronics by sourcing faulty inductors and SMDs. Ferrite beads, leaded and toroidal inductors and transformers – all of our products are tested in-house on high-frequency, 30MHz testing tables. So defect rates are kept at just 0.03 percent – the industry average is 0.1 percent. We're so sure of our products that we offer two-year warranties on everything we make. Orders for just \$100 worth of product are welcome. Call now for samples in five days.
